Subject: Question about L Drive space saving measures

Good afternoon Jon,

As I have been working to remove excess files from the L Drive, I've discovered some old web files from the time when Kuen was the webmaster for the lab. They're in a folder called RTP Services that is 11.9 GB in size. The files are old, none of them are newer than from 2012.

I don't believe that the files are needed anymore and were created for a for the ESD Las Vegas website. I think that after she ceased being webmaster around 2013, EPA rebuilt those pages.

Here's a link to the folder. Please let me know if you'd like to keep it in the archive or if it's OK to delete it.

L:\Priv\VIS\VIS\RTP Services

Thank you,

Subject: L-Drive performance degradation- PLEASE READ

Hello all!

Just a quick notice that as part of the ORD NERL lab closure, we are completing our process of shutting down the datacenter here in Las Vegas on Friday, July 27th. This will impact the access speed you normally have to the L drive, as your files will have been moved to Cincinnati. Due to the remote location from LV you may see a slight delay in saving and retrieving files to that location. Large files could take a considerable amount of time depending on the file size. You can of course utilize your OneDrive same as before as that will not change. There should not be any other systems affected with the shutdown. If you have any questions please let me know. I will be in transit from RTP back to LV the remainder of today but will be in the office tomorrow to assist if needed. Thank you for your patience and understanding.
